

Privacy Policy for MultiWork++

Last updated: October 30, 2025

Welcome to MultiWork++, an app published by DblancoStore.

We take your privacy seriously. This Privacy Policy explains how the MultiWork++ app ("App") handles your information. The short answer is: it doesn't.

1. The "Zero Data Collection" Policy

MultiWork++ is a 100% offline utility application designed to run entirely on your local device.

We do not collect, store, log, use, share, or transmit absolutely any of your personal information.

No personally identifiable information (PII).

No telemetry or usage analytics.

No automatic crash reports.

No email address, username, or account information.

2. Permissions and Use of Local Data

For MultiWork++ to function as an automation tool, it needs permissions to observe and simulate mouse and keyboard inputs.

It's crucial to understand how this data is used:

Keystroke and Click Capture: When you use the "Add Key" or "Capture Position" functions, the App monitors your inputs. This information is used exclusively to fill the action fields inside the App.

Global Hotkeys: The App monitors the Alt+A key combination in the background only to detect the emergency stop command.

Script Execution: When you execute a script, the App uses its script information to simulate mouse and keyboard inputs.

Important: All input information the App observes or uses never leaves your computer. It is not saved, not sent to us, and not shared with third parties.

3. Your Automation Scripts

The automation scripts you create and save using MultiWork++ belong to you. They are saved as local files (JSON) in a location on your computer that you choose. We do not have access to these files or their contents.

4. Internet Connectivity

MultiWork++ does not require and does not use an internet connection to function. It does not “phone home” nor send data to our servers.

5. Changes to This Policy

We may update this Privacy Policy from time to time, especially if future updates to the App change how data is handled. Any changes will be published on this page and on the app’s Microsoft Store listing.

6. Contact
